

If 1 adult helps 2 children in school once a week, who learns the most?

Number Partners helps you find the answer.

Number Partners is an innovative scheme which promotes the enjoyment of maths amongst children in primary and secondary schools. It supports the Government's National Numeracy Strategy, focusing on those youngsters who could benefit from extra support with maths. This partnership between business and local communities recognises the importance of numeracy to every child's long-term prospects.

Number Partners benefits all those involved:

- Through the use of child-friendly games and puzzles and the dedicated attention of their Number Partner, the children develop both their ability and confidence with numbers and their self-esteem and communication skills.
- Teachers value the extra support that Number Partners volunteers bring which not only helps the pupils taking part but also has an impact on the rest of the class.

- Volunteers – from all areas of business – develop their personal and business skills through fun, rewarding sessions with the children.
- Employers attract and retain loyal staff who value the opportunity to participate in a worthwhile scheme that benefits the local community.

Can you spare an hour a week during term time to be a Number Partners volunteer? Contact

The national Number Partners consortium and funders include: Business in the Community, Count On, Dresdner Kleinwort Wasserstein, Educational Communications, Freshfields Bruckhaus Deringer, HSBC, KPMG LLP (UK), Sir John Cass's Foundation, Tower Hamlets Education Business Partnership, Unilever and Watson Wyatt LLP.
